DETAILED ACTION

Receipt is acknowledged of the amendment, filed on 10/26/2010, which has been entered in the file. Claims 54 & 55 have been canceled. Claims 39-53 & 56-64 are pending.

Claim Rejections - 35 USC § 112

Claims 52, 53, 62 & 63 were previously rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims have been amended to overcome the 35 U.S.C. 112 rejection. Therefore the rejection of claims 52, 53, 62 & 63 has been withdrawn.

Allowable Subject Matter

Claims 39-53 & 56-64 have been allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: Regarding independent claims 39 & 51, the prior art of record, taken alone or in combination, fails to teach or fairly suggest a generally disc-shaped token having a body produced by multiple injections of plastic material, the token comprising a single-piece core of the body of the token produced by a first injection of plastic material wherein the core of the token incorporates an insert embedded in the plastic material of the central portion of the body during the first injection and comprising a contactless electronic microchip identification device, wherein the insert is secured between a first and second half-shell

of a first injection mold during said first injection of plastic material such that said resulting generally disc-shaped single-piece core is a single-piece construction with said insert being embedded within said plastic material of the central portion of the body of the core, when taken in combination with the other respective claimed limitations.

Regarding independent claim 52, the prior art of record, taken alone or in combination, fails to teach or fairly suggest a method of fabricating a body of a token comprising placing an insert comprising a contactless electronic microchip identification device in a first injection mold, two half-shells whereof define a first imprint corresponding to a generally disc-shaped core of the body of the token and holding the insert at a center of the first imprint by axially clamping the insert between the two half-shells of the first mold, and injecting the core of the token and then placing the core of the token in a second injection mold and injecting a covering layer, when taken in combination with the other claimed limitations.

Dependent claims 40-50, 53 & 56-64 would be allowable by virtue of their dependencies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
